Summary

Experienced Software Engineer with over 2.6 years of expertise in WordPress, PHP, and Laravel development. Currently contributing to Jamtech Technologies, delivering scalable e-commerce platforms, custom plugins, and robust backend APIs. Adept at performance optimization, debugging complex issues, and building full-stack web applications with clean architecture and maintainable code.

Key Expertise:

- ☐ Payment Gateway Integration – Stripe, PMPro, Authorize.Net
- ☐ Firebase – Push Notifications, Real-time Chat Systems
- ☐ WordPress & WooCommerce (Custom Plugins, Theme Development)
- ☐ PHP & Laravel (RESTful APIs, MVC Architecture)
- ☐ E-commerce Solutions (Payment Gateways, Product Configurations)
- ☐ Full-Stack Development (Frontend: HTML/CSS/JS; Backend: PHP/Laravel)
- ☐ Database Optimization (MySQL, Query Tuning)

Technical Skills

- **Backend:** PHP, Laravel, WordPress, WooCommerce, Java
- **Frontend:** JavaScript, jQuery, HTML/CSS
- **Databases:** MySQL, Firebase Realtime DB
- **APIs/Integrations:** Stripe, PMPro, Authorize.Net, Firebase Cloud Messaging
- **DevOps:** Git

Experience

Jamtech Technologies Pvt Ltd — Jul 2024 – Present
Software Engineer

- Laravel & WordPress APIs: Developed high-performance REST APIs for mobile/web apps using Laravel and Firebase.
- Payment Solutions: Integrated Stripe, PMPro, and Authorize.Net for secure transactions, reducing payment failures by 30%.
- Schema SEO Implementation: Programmatically integrated JSON-LD schema markup (Product, Breadcrumb, FAQ, Organization, etc.) in WordPress themes and plugins to improve search engine visibility and rich result eligibility.

Webkul Software — Jan 2023 – Jun 2024
Associate Software Engineer

- Custom WooCommerce Plugin Development: Developed 15+ custom plugins to extend WooCommerce functionality (e.g., Twilio SMS alerts, dynamic pricing, shipping methods, product add-ons)
- Firebase Push Notifications: Integrated Firebase Cloud Messaging for order status updates, improving customer retention by 20%.
- Payment Gateway Integration: Debugged and ensured compliance for popular gateways like Stripe and Authorize.Net.
- Complex Product Types: Built advanced configurations, including subscription-based and variable product types for scalable store customization.

Projects

- **Ridley's Butcher Shop:** (link) – Built all custom REST APIs for an iOS e-commerce app (React Native) powered by WooCommerce. Covered key features such as product listing, authentication, cart, wishlist, and order placement. Integrated secure payments via Authorize.Net, and ensured real-time inventory sync. Delivered fast, secure, and scalable APIs to support seamless frontend integration.
- **Agreement Vault:** (link) – Developed secure backend APIs and dynamic web forms for a realtor-focused app. Enabled form access via WebView, PDF generation, and secure data submission. Integrated Twilio to send form links and client details via SMS. Delivered scalable endpoints for seamless document management.
- **Objective Setting:** (link) – Built secure and scalable REST APIs using Laravel for an Android app helping leaders and managers set clear objectives and key result areas (KRAs). Supported team collaboration, guided workflows, user roles, and downloadable desktop templates. Delivered robust backend logic for goal tracking, document generation, and real-time data syncing to ensure smooth and efficient app performance.

- **Personal Playbook:** (link) – Contributed to a sports psychology app focused on training athletes' mental skills. Used WordPress to build and manage content-driven features that support coaches and athletes in developing mental strength. Implemented user-friendly interfaces and dynamic content modules to enhance accessibility, engagement, and the coach-athlete relationship.

Education

MMDU Haryana   Aug 2019 – Jun 2023
Bachelor of Technology (CSE)
